A–NZ receiving capabilities

Proposed change to remove support for PINT A–NZ busdox

Proposed Change

It is proposed that PINT A-NZ documents not support busdox (exact match) to reduce complexity for sending software providers.

What does this mean?

1. All receivers must register PINT A-NZ receive capabilities using wildcard (best match) by 28 Feb
2. No 'exact match' option for PINT A-NZ until 15 May 2025 when exact match receive capabilities may be published using the wildcard scheme

How does it reduce complexity?

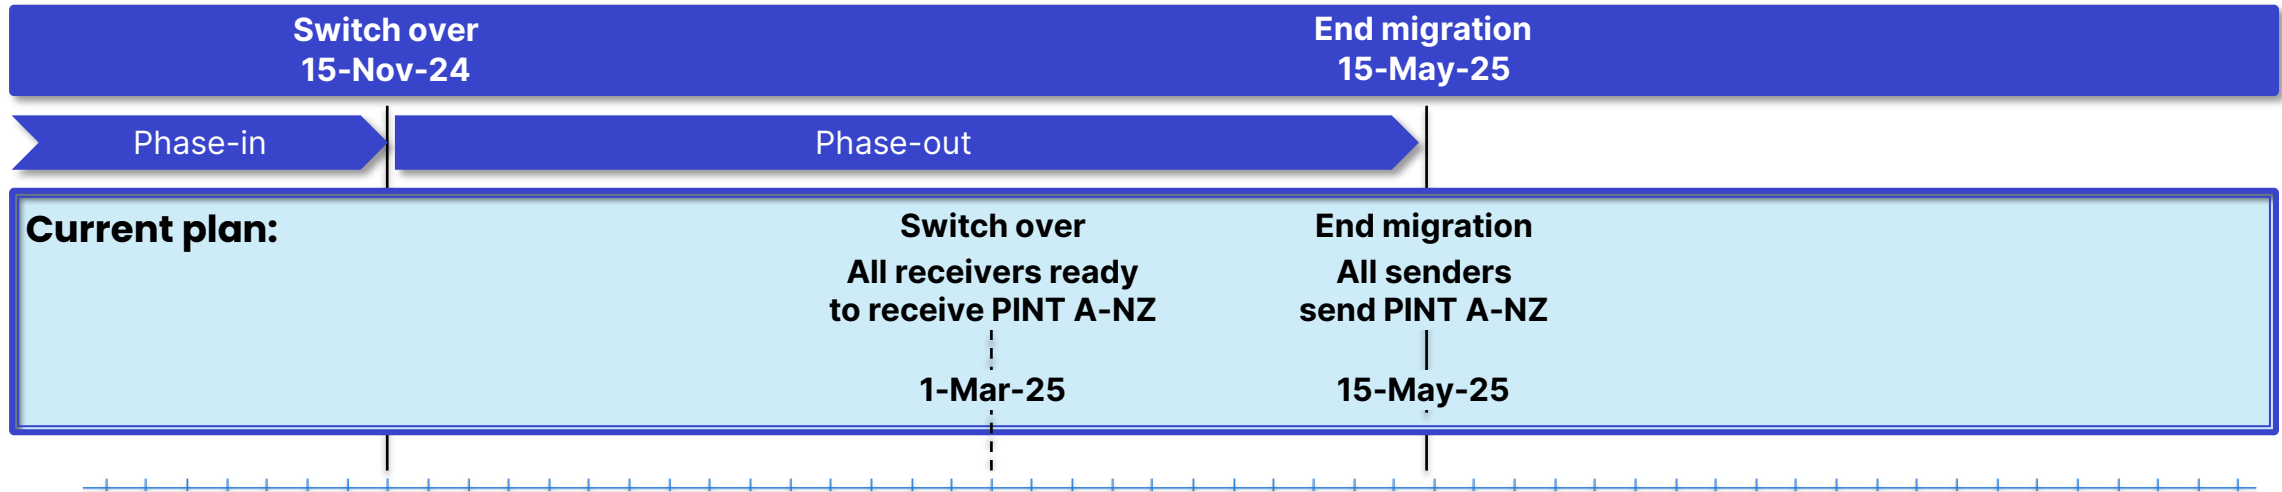

It will reduce complexity for senders by providing certainty that the document type identifier scheme for PINT A-NZ documents will always be wildcard.

This applies both when:

- performing a lookup of a participant's receive capability; and
- constructing the SBDH.

PINT A-NZ and PFUOI v4.3.0 migration timelines

Published plan:

Current plan:

Switch over
All receivers ready
to receive PINT A-NZ
1-Mar-25

End migration
All senders
send PINT A-NZ
15-May-25

PFUOI v4.3.0

Change Doc Type Scheme ID for exact match receiving capabilities

Sender readiness

Lookup algorithm MUST test
for exact & best match wildcard
document type identifiers

Senders update PINT lookup algorithm

Receivers MAY register exact
match receiving capabilities

15-May-25

Receiving capabilities – allowed and required in A-NZ

Summary of Proposed Position:

Capability Lookup

PINT A-NZ Senders need to check for the following receive capabilities:

- ~~• busdax-docid-qns pint:billing-1@aunz-1~~
- peppol-doctype-wildcard pint:billing-1@aunz-1 (from 15 May 2025)
- peppol-doctype-wildcard pint:billing-1@aunz-1*
- peppol-doctype-wildcard pint:billing-1*

SBDH

Senders can reliably use “peppol-doctype-wildcard”

Receiving capabilities

- All receivers MUST publish a wildcard best match capability by 28 February 2025
- Receivers MAY publish a wildcard exact match capability from 15 May 2025

Feedback

Please contact your Peppol Authority with any questions that weren't answered by today's presentation and any feedback you have on the proposal.
